

## Spring Grove Primary School

25<sup>th</sup> September 2020

Dear Parents and Carers,

You will be aware that rates of infection in London have risen and a number of primary schools have now experienced confirmed cases of Covid-19. At Spring Grove we remain healthy and have had no positive cases. In order to remain in this position it is crucial that the following points are noted and adhered to:

- Once your child has either been dropped off or collected please leave the school site promptly and do not congregate in groups by the gates or on the pavement.
- Maintain a safe distance from other parents at all times.
- Please only make contact with your own child or any children that you have responsibility for. Some parents are chatting with/ holding hands/ hugging children other than their own
- Enquiries for the school office should be made by either telephone or email.
- Please do not approach members of staff. Again, all enquiries should be made via email or telephone.

I understand and recognise that parents may wish to have a quick chat with the class teacher but in the current situation this is not safe. There have been several occasions where parents have approached teachers to ask something but have not kept a safe distance and have not worn a face covering. I am doing all that I can to try and keep our school covid-free and open. None of us want a situation where we have positive cases and have to close the school to bubbles of children and staff. Your support and cooperation is both appreciated and needed to continue keeping our school community healthy.

Yours sincerely,

Susan Colley  
Headteacher
